CAREER OBJECTIVE

Results-oriented Team Lead, Mobile Application Developer, and Full Stack Developer with 1+ years of professional experience in Flutter, Laravel, PHP, MySQL, REST APIs, and modern web technologies. Skilled in building scalable web applications, mobile applications, CRM/ERP systems, and custom software solutions from concept to deployment. Experienced in leading development teams, handling client meetings, analysing business requirements, coordinating project execution, and collaborating across development, digital marketing, and graphic design teams. Recognized for contributing innovative technical ideas, product enhancement strategies, workflow improvements, and business growth initiatives by working closely with management. Committed to delivering high-quality, scalable, and user-focused software solutions while driving continuous improvement and organizational success.

WORK EXPERIENCE

Crystree Solutions Private Limited, Trichy

May 2026 – Present

Team Lead | Mobile Application & Full Stack Developer

- Lead end-to-end web application, mobile application, CRM/ERP, and custom software development projects.
- Manage project planning, task allocation, team coordination, and successful project delivery.
- Conduct client meetings, gather requirements, prepare project proposals, and provide technical solutions.
- Coordinate development, digital marketing, graphic design, and UI/UX teams to ensure smooth project execution.
- Review application architecture, code quality, testing, deployment, and production support.
- Collaborate with management to improve workflows, operational efficiency, and business growth.
- Monitor project progress, resolve technical challenges, and ensure timely delivery of high-quality solutions.
- Serve as the primary point of contact between clients, management, and technical teams throughout the project lifecycle.

Tech Stack: Flutter, Laravel, PHP, MySQL, JavaScript, HTML5, CSS3, Bootstrap, REST APIs, Firebase, Git

Freshora Digital Technologies, Trichy

May 2025 – May 2026

Mobile Application & Full Stack Developer

- Developed and maintained cross-platform mobile applications using **Flutter** and full-stack web applications using **Laravel, PHP, MySQL, HTML5, CSS3, Bootstrap, and JavaScript**.

- Designed and developed end-to-end web and mobile applications, including frontend, backend, database architecture, and REST API integration.
- Worked closely with the management team by contributing technical ideas, product improvements, workflow optimization, and business growth initiatives.
- Participated in project planning, requirement analysis, feature discussions, and technical decision-making to improve project quality and delivery.
- Collaborated with developers, designers, and stakeholders to ensure smooth project execution and timely delivery.
- Developed and maintained CRM, ERP, and custom business applications while optimizing application performance and database efficiency.
- Integrated third-party APIs, resolved technical issues, and continuously enhanced application functionality and user experience.

Tech Stack: Flutter, Laravel, PHP, MySQL, HTML5, CSS3, Bootstrap, JavaScript, REST APIs, Git

PROJECTS

FSM (Sales Force Management System)

- Developed a Sales Force Management (FSM) application to manage leads, customer follow-ups, meetings, and order processing.
- Built modules for lead assignment, reminders, notifications, sales tracking, and team performance monitoring.
- Enabled marketing and sales teams to track customer interactions from lead generation to order confirmation.
- **Tech Stack:** Flutter, Laravel, PHP, MySQL, REST APIs

Buildours – Customer, Retail, Warehouse & Rider Applications

- Developed four mobile applications for a construction materials platform, enabling wholesale and retail sales of house construction products.
- Built separate applications for **Customers, Retailers, Warehouse Management, and Delivery Riders** to streamline the complete order and delivery process.
- Implemented product browsing, order placement, inventory management, order tracking, delivery status, and user management features.
- Integrated REST APIs for real-time synchronization between mobile applications and the backend system.
- **Tech Stack:** Flutter, Laravel, PHP, MySQL, REST APIs

Atmarai CRM

- Developed a CRM application for managing machinery exhibitions, customer invitations, lead collection, and follow-up activities.
- Built modules for Expo Management, Lead Tracking, Customer Management, and Sales Monitoring with advanced search and multiple filters.

- Integrated Call, WhatsApp, Email, and SMS communication features for customer engagement and follow-up.
- Developed dashboards to track expo activities, collected leads, customer interactions, and lead conversion.
- **Tech Stack:** Laravel, PHP, MySQL, JavaScript, Bootstrap, REST APIs

SRM College Examination Management System

- Developed a role-based Examination Management System with dedicated portals for **Super Admin, Admin, Principal, HOD, Staff, Teachers, Students, and Examination Cell**.
- Implemented modules for **Student, Class, Subject, Faculty, Hall Ticket, Hall Allocation, Exam Attendance, Mark Entry, Result Publishing, and Report Management**.
- Built secure authentication, role-based access control, and automated workflows for efficient examination administration.
